Research Fields

International Economics, Applied Econometrics, and Macroeconomics.

Work in progress

1. World Shocks, world prices and domestic inflation (Job Market Paper).
An empirical investigation on the impact of commodity prices' co-movement on domestic inflation, using a structural vector autoregressive model across 67 countries.
2. The impact of income inequality on investment in resource-rich countries.
This includes an empirical investigation that uses difference and system generalized method of moments (GMM) estimators to a dynamic panel of 57 resource-rich countries.
3. Do commodity prices matter for estimating the output gap?
An empirical model to estimate the output gap in which global shocks affect the output gap through changes in commodity prices and other global factors across 27 countries.
